

MOBILE PRINTING SOLUTIONS

# EFI PrintMe Mobile

## Wi-Fi Printing From Your Tablet or Phone

EFI PrintMe® Mobile is a Windows application that enables direct Wi-Fi printing from a wide variety of mobile devices (iPads, iPhones, Android devices, laptops and Chromebooks) to network printers regardless of brand. PrintMe Mobile enables enterprises to save money by using their existing printers and is scalable up to thousands of users across multiple wireless subnets. PrintMe Mobile is quick to deploy, simple to use and easy to manage. Best of all, you can try the full version free for 45 days with unlimited users and prints.

### Wi-Fi Printing

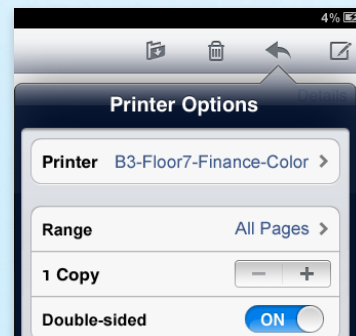

Print from Apple® iOS devices using the native print function, without an additional mobile app. For Android devices, EFI offers a PrintMe Mobile app to print using the “Share” command or similar menu functions. Users may print to any network printer from Windows laptops and tablets using a single EFI print driver, from Mac computers using the Nearby Printers function and from Chromebooks using a Chrome extension for similar Wi-Fi functionality.

Tap Print. There is no need to leave the application.

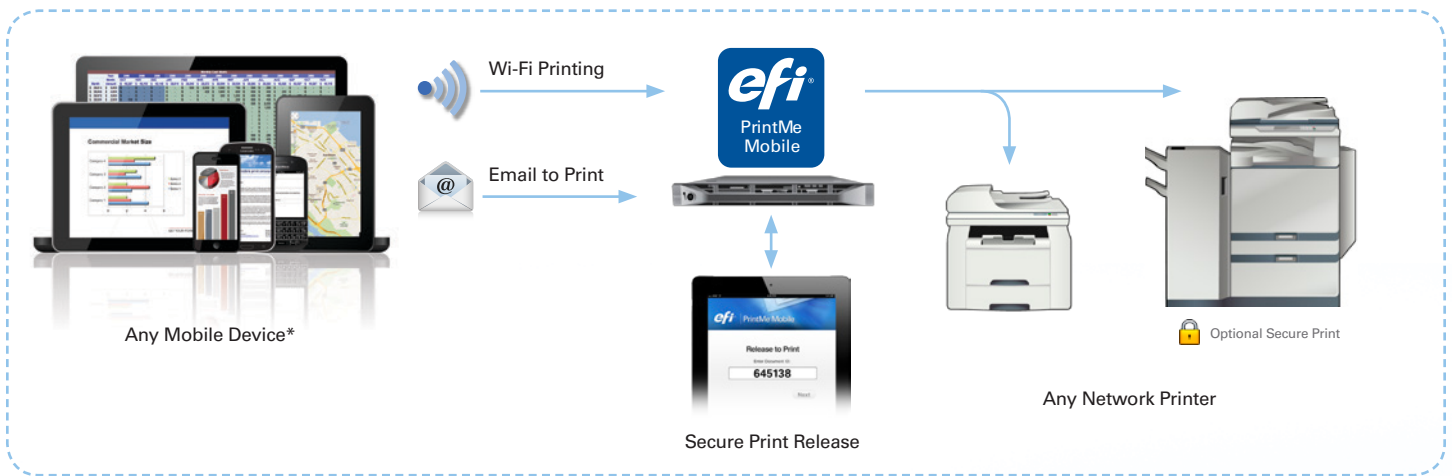

PrintMe Mobile automatically populates a list of available printers.

Select print options and print!

### Email to Print

Simply send (or forward) an email with any attachments to a printer. Attachments will print without the need to open them. Wi-Fi or email jobs can be printed immediately or held in a local queue for secure printing.

\* Mobile devices outside of the firewall can print via secure Wi-Fi using the PrintMe Mobile L100 appliance.

corporate network

## Product Features

EFI invents integrated digital technology for businesses and enterprises worldwide that helps them increase their profits, productivity, efficiency and customer satisfaction.

Find out more at [www.efi.com](http://www.efi.com).

- Prints to any existing network printer; manufacturer agnostic
- Wireless "AirPrint-like" functionality for Apple and Android devices
- No app needed for iOS or OS X devices
- Supports secure email to print from both work and personal email accounts
- Private or public cloud printing
- Works across multiple wireless subnets
- Allows multiple virtual printers to be created per printer license to enable use of advanced printer features.
- Licenses for EFI Fiery Driven™ printers are free.
- Administrative dashboard provides search, filters, tags, and data export/import capability to identify, configure, and check states of hundreds of printers
- Authenticates mobile users via Active Directory
- Provides printer access control
- Enables tracking of mobile printing in job accounting software, e.g., Equitrac Office and Express, Go Print, PaperCut, Print Audit, Sepialine Argos
- Secure print release with internal or external hold queue
- Internet proxy support
- Exportable reporting
- Languages (English, French, Italian, German, Brazilian Portuguese, Spanish, Simplified Chinese)
- Enables Wi-Fi printing for employees or guests from outside the firewall with optional PrintMe Mobile L100 appliance (see datasheet)
